DETAILED ACTION

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 4 are rejected under 35 U.S.C. 102(b) as being anticipated by Dehike (Figs. 14 and 15) or Alvi et al. (Figs. 5 and 7). Regarding claim 4 and the last subparagraph of the claim, the intended outcome of the use of the "fastening tool", i.e., to "peel a coating of the workpiece" is given little weight in the apparatus claim; the prior art references teach the structure of the apparatus.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Dehike or Alvi et al. The prior art references to Dehike and Alvi et al. both teach the claimed invention excepting the product having a peeled coating. It would have been obvious to one of ordinary skill in the art at the time of the invention that the apparatus of the prior art would have caused such a rupture or peeling of a coating on the metal if so present. It would have been obvious to have provided the workpiece of the prior art with a coating

which are well known in the art, such as paint or corrosive coatings. The intended use of the coating or lack thereof is given little in any weight in the article claims.

2. Claim 3 is allowed.
3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
4. Any inquiry concerning this communication or earlier communications from the Examiner should be directed to David B. Jones whose telephone number is (571) 272-4518.

Any inquiry of general nature or relating to the status of this application should be directed to the Group receptionist whose telephone number is (571) 272-3700.

In the event that the Applicant (s) wishes to communicate via Fax number for Group 3700 is (703) 872-9306.
